

Dr. Francesca C. Ghisetti is a former Professor of Structural Geology at Catania University (Italy) and Research Professor at the University of Otago (New Zealand). She is currently Adjunct Professor in the Department of Geological Sciences, University of Canterbury (New Zealand) and consultant for TerraGeoLogica (<http://www.terrageologica.com>). As a field-oriented structural geologist she has worked in Italy, Greece, U.S.A, Australia and New Zealand, with scientific publication and geological maps focused on the structural setting of thrust-and-fold belts, basin evolution, active faulting, and seismotectonics.
